Meter readings to confirm

Papat Properties · live system figures on 9 Oct 2026 · 2,837 water readings checked

READINGS TO CONFIRM
214
Across 72 units. Each one is listed once below.

TENANTS BILLED AFTER LEAVING
13
Readings saved on their account for months after the move-out date.

READINGS LOWER THAN BEFORE
32
On a tenant's account, lower than the month before.

UNITS WITH NO TENANT RECORDED
22
85 readings; the meter moved in 9 of them.

Each row has a reference. A reply with the reference and the right figure or a short note is all we need, for example **B3: the meter was replaced in February** or **C5: 218 is right**. The Answer column is there if it is easier to write on a printed copy.

A. Readings after the tenant moved out

These tenants still have water readings on their account for months after the move-out date in the system, so that water is added to their final bill.

It would help to know whether each tenant left later than the date shown, or whether someone else was living in the unit.

B. Readings lower than the month before

Each reading here is lower than the one before it on the same tenant's account.

It would help to know whether the meter was replaced, or which of the two figures is mistyped.

C. Two readings for the same month

Each of these has two readings saved for the same month.

It would help to know which figure is right. Where the figure is the same twice, we will simply remove the extra copy.

D. Readings not on the account of the tenant living there

These readings were taken while the tenant shown was living in the unit, but are not on their account yet.

A quick yes for each would let us add it to the tenant's account, where it would be billed as usual.

E. Readings while no tenant is recorded

These readings fall on dates when the system shows nobody living in the unit. Where the meter moved, water was used.

It would help to know whether anyone was living in these units at the time, and from when, especially where the meter moved.
